When making any recommendations, I will give fair representation of applicable products, services or solutions and will encourage you to obtain at least three cost estimates for any product or service recommended.

The home energy rating that you have received evaluates building construction and HVAC system efficiencies. The rating assumes average occupancy conditions and **does not** account for individual lifestyles.

Your actual energy use may vary from the estimates that are provided you to the extent that actual conditions and lifestyle varies from that assumed in the estimates for the reference house that we use.

ENERGY DESIGNED HOMES<sup>SM</sup> prescribes this Code of Ethics for all certified Raters. Any comments or questions directly related to your rating or the work that was performed for you on your home, as part of the rating should be directed first to the Rater who performed your rating. If you are not satisfied that appropriate remedial action has been taken, please contact ENERGY DESIGNED HOMES<sup>SM</sup> at 440-365-2262 or at EnrgDesign@aol.com.
